

# TRACHTE

THE RECOGNIZED LEADER IN

# PREFAB SUBSTATION CONTROL BUILDINGS

**Critical Equipment Protection | Superior Design | High Quality**

Trachte provides preassembled control buildings, electrical enclosures, and integrated electrical packages for transmission and distribution substations, renewable energy sites, power generation projects, and more.

## The Trachte Difference.

- Preassembled, modular, and factory-built
- Exceptional customer service from project design to delivery
- Channelframe™ Construction with Stand-Alone Galvanized Steel Framework
- Integrated Solutions including complete AC/DC electrical equipment, HVAC, house electrical, and customer-supplied equipment installed prior to shipment
- Optional security shielding for ballistics, EMP, and fire resistance available
- Two-year limited building warranty with 5-10-20 year extended warranties available
- Exterior Panels with Kynar 500 PVDF resin supercoating have a 30- and 40-year Paint Finish Warranty
- Meets ISO 9001/ISO 9001:2008 quality assurance standards for WI/GA production facilities
- Over 9,000 Trachte control enclosures installed worldwide

# TRACHTE

# Your Engineering Solutions Partner Since 1919.

Trachte designs each building to meet your specifications, and in accordance with the structural design load requirements for the final site location. The advantages of a TRACHTE® building are engineering, quality control, and project management from design to delivery.
